

TECHRACE 2k19

Tech race is an app-based treasure hunt. Techrace 2019, held on October 13, was an engaging, exciting and energetic event providing a power-packed kick-off to the build-up of Oculus. This event provided the perfect platform to amalgamate brain power with wanderlust thus decoding the clues and reaching the encoded destination in the least amount of time to gain the maximum points.

Each location of the hunt was encoded into clues, and players participated in teams of two. Upon reaching each location, the next clue was automatically updated on the app. To prevent the game from getting monotonous, some locations had offline games, like emoji charades. We also implemented Power Cards like Timers, Invisible, Wildcard entry.

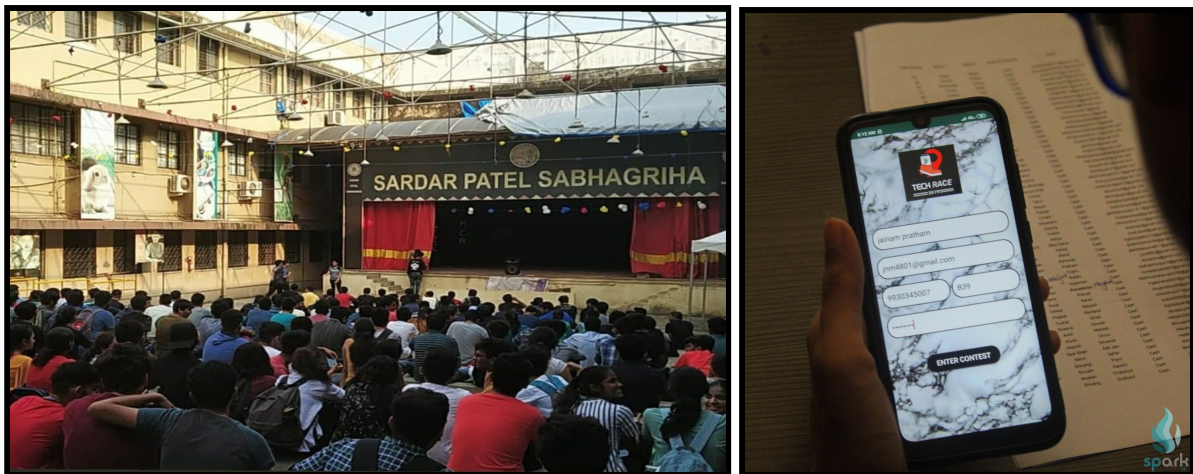

The registration for Techrace began in September. The final numbers for the same are given in the chart below.

We had 46 volunteers, whom we split into pairs and had placed at different locations based on their convenience. 28 volunteers had been called at 6:30 AM to the college. We had divided them into pairs or groups of 3 at the registration desks. We had 7 desks. (6 for Android and 1 for iOS).

All the participants had been called at 7. After the registration, the participants headed to the quadrangle where they were briefed about the rules of the game and functioning of the app. Beatboxing, dance and rap performances along with light refreshments were planned before the event's start.

The initial locations were common to all, after which the participants diverged into separate paths, on an edge-of-the-seat journey encompassing much of Mumbai. Starting from Bhavans campus' Mandir. The game began in SPIT and split into 2 tracks
