MOTIVATION

Shrestha Club is a forum to help youths channelize their energy and potential to become a 'Shrestha' - 'A Leader' within the society. Youths have energy and potential which are often misutilized due to a lack of quality guidance related to four quotients of life - **Intelligence, Physical, Emotional & Spiritual.**

Due to this, today we see a constant surge in the level of frustration and confusion within youths as well as professionals, to the extent they end up their very life committing suicide, thus ending their bright career & future.

FOCUS

Shrestha Club is unlike other clubs/committees which you would have come across by now. We focus not only on **competence** in trying to upgrade your skills and potentials but in developing your **character** as well. In that way, we stand out from the rest taking care of your **overall personality.**
