Panacea Meditech

Inspiring Better Health

Healthcare that's right for you.

Customized healthcare solutions according to your needs

This product provides tailor made plug-ins to cater to your specific needs. It is like having a personalized doctor at your home. The product will be helpful to known patients as well as to health conscious people who will get an easy and cheaper way to conduct routine checkups. Also with a Bluetooth interface, it can be easily connected to any Bluetooth device for data transfer

Simple Analysis
This product provides simple and yet accurate analysis of your medical data based on current and past medical records. Lucid and precise analysis leads to better understanding and hence rapid cure.

Always connected
With this product you can easily relay your medical data and records to your family doctor. No need of frequent clinical visits.

Portable and easy use
A 3.2'' touch screen interface with intuitive graphics makes this device very user friendly. Also small size makes it easy to carry anywhere.

Remote Monitoring

With a SD card support of up to 32GB, complete medical history of the user is stored in the card. It logs data for each medical measurement in universal format. Hence a medical expert sitting at a remote location can easily analyze the data without actual physical present. This technology will be a boon for remote under developed areas where medical care is sparsely available.

Engineering the flow of healthcare

Features:

- Human body temperature measurement with accuracy of 0.5 $^{\circ}$C.
- Abnormal temperature detections and data logging.
- 3 to 12 Lead ECG measurement support
- ECG raw waveform storing and recall function.
- ECG Analysis for automatic detection of various cardiac dysrhythmia
- Extensible SD card interface upto 32GB
- Bluetooth 2.0
