Emergency Aid and Tracking Device

Where help will find you...

FEATURES

- ✓ *State-of-the-art technologies like instant two-way communication with an emergency responder so that senior citizens can keep up with normal life while simultaneously knowing that help is nearby if something should go wrong.*
- ✓ *Medical History with an emergency contact number for easy access during the time of need.*
- ✓ *Location of the user on map when the button is pressed.*

PRODUCT

A wristband with an emergency calling push button

OPERATION

On pressing the button, emergency contacts are called in the sequence predefined in the memory of the device until one of the contact answers the call.

GSM SIM card module required.
