

In this fast and hectic lifestyle we often tend to miss out on our health and fitness which is always accompanied by many reasons that mostly includes lack of time or money. And this issue can now be tackled easily with our innovative project.

Here we provide a home based solution for such fitness issues where the user would simply plug into our system and start performing in front of it by imitating the moves that he/she would experience on the screen, where all these moves would be compared real time to the moves of the trainer and provide us with the necessary data of correction or degree of correctness.

Innovation and Entrepreneur Development Centre
[Funded by DST New Delhi],
Bhartiya Vidya Bhavan's,
Sardar Patel Institute of Technology
Munshi Nagar, Andheri [West], Mumbai-400 058
Mumbai-400 058

eZZe Fitness.

We merge digital world to real world...

Product Functions And Features

- The user can avail these services anywhere and at anytime of his/her choice.
- The system is easy to setup and can be configured within minutes.
- The moves of the user are compared real time to the moves of the trainer and the degree of correctness is provided.
- A new video can also be recorded by the user to avail the same benefits and customize their training sessions.
- It is very cost efficient as we can save a lot of money by actually not spending a fortune on such training and instead availing these facilities with perfect accuracy like that of trainer at our own house.
