TECHNOPRENEUR PVT. LTD.

Product Function & Features-:

1. Without monitoring wells, drilling our system will provide detection of underground water on single Touch Panel.
2. Along with detection of water it will also provide the depth of water
3. Our system becomes cost effective and environment friendly.
4. System works on both 230V A.C. MAINS and also on battery, so it can easily portable.
5. Apart from the detection of the water, by doing some changes our system can be used for detection of the other material.
