Kartik Killawala (Director)

Prof. Nataasha Raul (Joint Director)

Product: Food Smiles

Project: An online portal to prevent food wastage at local and global level.

Food Smiles Pvt. Ltd. was established in the year 2014-2015 by the promoters Nikita Moghe, Surbhi Mantri and Kartik Killawala at Innovation & Entrepreneurship Development Centre, Sardar Patel Institute Of Technology, Andheri(West),Mumbai.

The premier product of the company is the Food Smiles. Food Smiles is a Social Technology. It aims at reducing food wastage at local and global level. It is an online portal which provides a platform for Hotels, event planners, caterers and those industries involving mass wastage of food to update their waste but consumable food in terms of “Foodbank”. This “Foodbank” is then made available to the registered NGOs on the portal who shall then approach the concerned hotels to collect the consumable excess food. To encourage minimum food wastage at local level, an optimized ingredient-based recipe search engine has been developed. The domestic users can also create their foodbank and supply the healthy food to the nearest NGOs. The portal also provides other useful applications such as daily meal planner, calorie counter and expertise on healthy living. Thus Food Smiles has been born in a need to reduce food wastage, starvation and malnutrition.

This project was developed at Innovation & Entrepreneurship Development Centre , Sardar Patel Institute Of Technology, Mumbai.
