Product:**Siftsoft**

Project: **Face Recognition**

Siftech Pvt. Ltd. was established in the year 2012 by the promoters NehaBairathi, Rahul Daga, JigneshDarji and Rekha Panda at Innovation & Entrepreneurship Development Centre, Sardar Patel Institute of Technology, Andheri(West), Mumbai.

Our product is Siftsoft that is used for security purposes in housing societies to keep a record of all people entering the society premises. It detects the face of the person entering the premises, compares it with the database of known people and alarms the security personnel if the person is a trespasser.

The product aims at removing the dependence on continuous manual surveillance in housing societies thereby reducing criminal activities in the area. The motto of the company is to provide secure society premises with help of continuous unmanned surveillance.

This project was fully funded by Entrepreneurship Development Centre of Sardar Patel Institute of Technology, Mumbai.
